INSTITUTIONAL IDENTITY

عَلَّمَ الْإِنسَانَ مَا لَمْ يَعْلَمْ

ALLAM AL-INSĀNA MĀ LAM YA'LAM

"He taught man that which he knew not."

JMI's founding motto — from the opening revelation of the Qur'an (96:5)

VISION

To foster the goals of building a secular and modern system of integrated education for the sustainable development of society and a better future for all. Specifically, to lead at the intersection of computational science and biology, cultivating analytical minds capable of addressing complex global health and biological challenges through rigorous data-driven innovation.

MISSION

To become a world-class institution disseminating and advancing knowledge through instructional, research, and extension excellence. We are dedicated to providing an interdisciplinary environment that equips students with state-of-the-art computational tools and biological insights, empowering them to drive transformative discoveries in healthcare, agriculture, and biotechnology.

IN THEIR WORDS

Leadership & placement cell, 2026–27

Prof. Mazhar Asif
Vice Chancellor

Jamia Millia Islamia (JMI) strives to create an inclusive, equitable, and just human universe — we warmly invite industry partners to help us strengthen campus placement for M.Sc. Bioinformatics and our other programmes.

Prof. Raheela Farooqi
Director, University Placement Cell

The University Placement Cell works diligently to connect our talented, motivated students with leading organisations across sectors, in close collaboration with the Department.

Prof. Sabah Khan
Deputy Director, University Placement Cell

Our focus is to empower students with the tools and confidence to navigate the professional landscape successfully and make a meaningful impact.

Prof. Dr Saeed Uddin
Dean, Faculty of Natural Sciences

The Department produces quality IT professionals through postgraduate programmes including M.Sc. Bioinformatics, built on a thoughtfully crafted, industry-aligned curriculum.

Prof. Mohd Nazir
HOD, Dept. of Computer Science

Our curriculum blends strong foundational concepts with advanced, specialised topics through a project-based learning model, enabling students to take on diverse roles across the technology landscape.

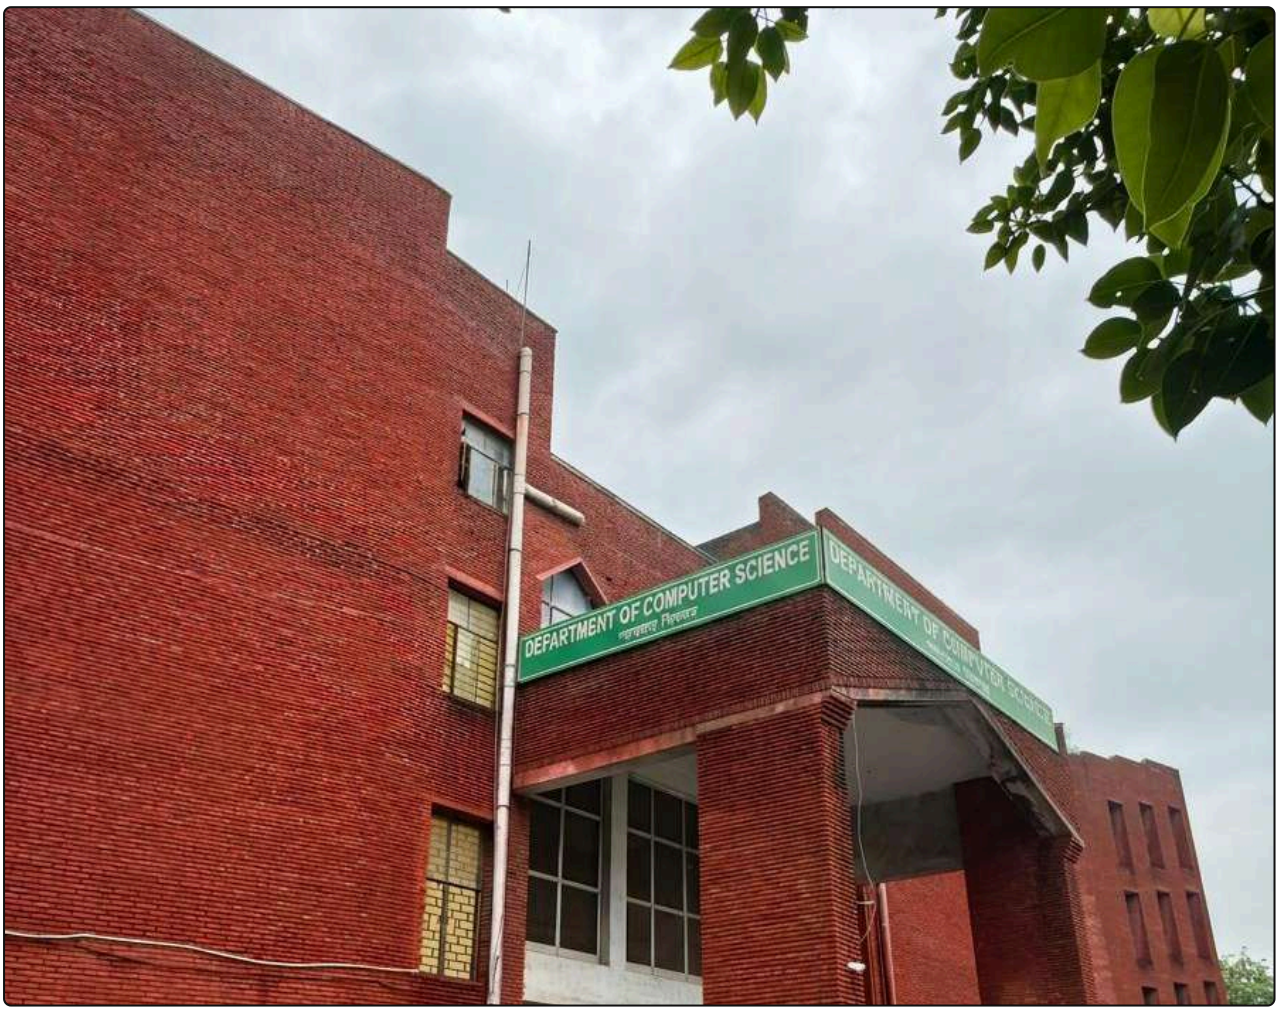

Prof. Suraiya Jabin
Teacher Placement Coordinator

The Placement Committee bridges academic learning and industry demands through workshops, expert lectures, and coding competitions — our past records are extremely good, but the best is yet to come.

ABOUT JAMIA MILLIA ISLAMIA

Institution of National Importance

Established in **1920**, Jamia Millia Islamia is an 'Institution of National Importance' and a prestigious Central University in New Delhi, embodying its founders' vision to synthesise traditional wisdom with a modern scientific temper. In 2023, JMI culminated its **centenary celebrations** — 100+ years of academic excellence — with a Centenary Year Convocation at Vigyan Bhawan.

RANKINGS & ACHIEVEMENTS

Global & National Recognition

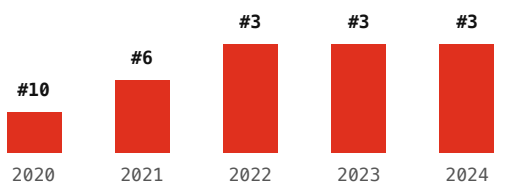

Jamia Millia Islamia has established itself as a premier institution of higher learning, consistently maintaining top-tier national rankings while aggressively expanding its global footprint. Driven by high research output, exceptional teaching standards, and strong industry linkages, the university holds a prestigious **A++ accreditation from NAAC** and continues its dominant streak in the highly competitive **NIRF Rankings**.

A++ NAAC GRADE (CGPA 3.61)	**3rd** NIRF UNIVERSITY RANKING, 2024	**13th** NIRF OVERALL RANKING, 2024	**19th** NIRF RESEARCH RANKING, 2024
686th QS WORLD RANKING, 2027	**501–600** THE WORLD RANKING, 2026	**#6** THE INDIA RANKING, 2026	**416th** UI GREENMETRIC WORLD, 2024

A TRAJECTORY OF EXCELLENCE

Over the past five years, JMI has demonstrated a remarkably consistent and upward trajectory in the Ministry of Education's NIRF Rankings. Breaking into the top 3 Universities nationwide in 2022, Jamia has rigorously defended its elite position, showcasing sustained brilliance in academic outcomes, research citations, and global perception.

NIRF UNIVERSITY RANKING TREND, 2020–2024

ABOUT THE DEPARTMENT

DEPARTMENT OF COMPUTER SCIENCE

Established in **1999**, the Department has evolved into a centre of excellence for higher learning and research, cultivating highly skilled human resources across Computer Science, Bioinformatics, and Artificial Intelligence.

Alongside M.Sc. Bioinformatics, the Department offers MCA, PGDCA, and M.Sc. in Artificial Intelligence & Machine Learning. We maintain a strict commitment to producing professionals who can seamlessly bridge the gap between theoretical knowledge and real-world industrial demands.

INFRASTRUCTURE & FACILITIES

The Department boasts state-of-the-art computational infrastructure, featuring advanced bioinformatics laboratories equipped with high-performance workstations and specialized software suites. Dedicated servers support intensive tasks like molecular dynamics simulations, NGS data processing, and large-scale machine learning workflows, providing students with a robust environment for cutting-edge research.

ABOUT THE DEPARTMENT

Continued

FACULTY EXPERTISE

Our distinguished faculty members bring a wealth of expertise spanning structural biology, genomics, computational drug design, network biology, and artificial intelligence. This rich, interdisciplinary knowledge base ensures students receive comprehensive mentorship, guiding them to answer complex biological questions using advanced computational methodologies.

RESEARCH & INDUSTRY DIALOGUE

The Department actively fosters academic-industry partnerships. Recently, we hosted an International Seminar on Industry 4.0 (4 Feb 2026), exploring the convergence of AI, Big Data Analytics, and IoT. The event featured keynote speakers from the University of Melbourne, UT Dallas, and South Asian University, highlighting our commitment to global scientific discourse.

M.SC. BIOINFORMATICS

A **two-year, four-semester** programme preparing biological-science graduates for a career in the **post-genomics era**. The curriculum builds a strong foundation in biotechnology, data analysis, and computational biology, preparing students for careers across the bioinformatics and pharmaceutical industries.

SEMESTER I

01	**Introduction to Bioinformatics**	
02	**Computing Fundamentals**	
03	**Programming in C++**	
04	**Comparative & Functional Genomics**	
05	**Programming in R**	
06	**Lab I — Bioinformatics Tools**	
07	**Lab II — OOP with C++ & Linux**	

SEMESTER II

08	**Systems Biology & Applications**	
09	**Data Structure**	
10	**Essential Mathematics & Biostatistics**	
11	**Database Management System**	
12	**Elective II — Intro to Machine Learning (NPTEL, IIT Madras)**	ELECTIVE
13	**Lab III — DBMS with MySQL**	
14	**Lab IV — Systems Biology Tools**	

SEMESTER III

15	**NGS Data Analysis**	
16	**Structural Bioinformatics & Drug Design**	
17	**R Advanced Algorithm for Comp. Biology**	
18	**Web-based Programming**	
19	**Elective III — AI for Clinicians (NPTEL, IIT Madras)**	ELECTIVE
20	**Lab V — Drug Design + NGS**	
21	**Minor Project (Skills Enhancers)**	

SEMESTER IV

22	**Major Project — 6-Month Industrial Training**	

Note — Semester IV is structured entirely around a six-month industrial training placement, culminating in the Major Project — giving every graduating cohort direct, extended exposure to a research or industry environment before graduation.

FACULTY

Core to the programme

Dr. Khalid Raza — ASSOCIATE PROFESSOR · PROGRAMME FACULTY

Specialization: Translational Bioinformatics, Computational Intelligence.

Dr. Raza focuses on the intersection of algorithmic design and complex biological networks. His research spans transcriptomics, gene regulatory network modeling, and computational drug discovery, bringing rigorous AI techniques to systems biology.

Dr. Rafat Parveen — PROFESSOR · PROGRAMME FACULTY

Specialization: Computational Biology, Bioinformatics, Cloud Security.

With extensive experience in secure scalable computing, Dr. Parveen bridges cloud infrastructure with computational biology. Her work ensures that large-scale genomic analyses and biological databases can be handled securely and efficiently in distributed environments.

Dr. Suraiya Jabin — PROFESSOR · PROGRAMME FACULTY & PLACEMENT COORDINATOR

Specialization: AI in Healthcare, Biometrics, Computational Biology.

Dr. Jabin is a leading expert in applying deep learning and AI to clinical datasets and biometrics. She guides students in translating computational models into actionable healthcare solutions, while also driving industry engagement and placement strategies.

Dr. Monica Mehrotra — PROFESSOR · DEPARTMENT FACULTY

Specialization: AI, Machine Learning, Social Network Analysis.

Dr. Mehrotra brings deep theoretical expertise in machine learning and complex network analysis. Her methodological insights help bioinformatics students tackle large-scale biological networks, clustering algorithms, and predictive modeling in multi-omics data.

Dr. Mansaf Alam — PROFESSOR · DEPARTMENT FACULTY

Specialization: AI, Big Data Analytics, Cloud Computing.

Specializing in the handling of massive datasets, Dr. Alam teaches advanced big data architectures. His work is critical for students learning to process terabytes of Next-Generation Sequencing (NGS) data using modern distributed computing frameworks.

FACULTY

Continued

Dr. Mohd Nazir — PROFESSOR & HEAD OF DEPARTMENT

Specialization: Software Reliability, Testing & Engineering.

As the HOD, Dr. Nazir ensures the curriculum maintains rigorous software engineering standards. His expertise in software reliability guarantees that the computational tools and pipelines built by students are robust, reproducible, and production-ready.

Dr. S. M. K. Quadri — PROFESSOR · DEPARTMENT FACULTY

Specialization: Software Engineering, Reliability Engineering.

Dr. Quadri brings decades of experience in software architecture and reliability. His foundational teaching equips students with the engineering discipline required to build scalable, fault-tolerant bioinformatics software systems and maintainable codebases.

Dr. Rajendra Kumar — PROFESSOR · DEPARTMENT FACULTY

Specialization: Information Security, Network Security, Data Analytics.

Dr. Kumar's expertise in security and data analytics is vital for the modern era of biomedical data. He focuses on protecting sensitive genomic information and securing health informatics pipelines against vulnerabilities during large-scale data mining.

Dr. Syed Zeeshan Hussain — PROFESSOR · DEPARTMENT FACULTY

Specialization: Computer Networks, Cyber Security, IoT.

With a focus on IoT and secure networks, Dr. Hussain's research is highly relevant to wearable health-tech and real-time biomedical sensors. He guides students in understanding the data transmission and security protocols underlying modern connected healthcare.

Dr. Taran Singh Bharti — PROFESSOR · DEPARTMENT FACULTY

Specialization: Security, Algorithms, Databases, Theory of Computation.

Dr. Bharti bridges theoretical computer science with robust database management. His deep knowledge of algorithms and database theory provides students with the critical skills needed to optimize and query massive biological databases efficiently.

GUEST FACULTY

Industry & Academic Experts

Dr. Sufian Badar — JAMIA HAMDARD UNIVERSITY

Specialization: Computational Biology, AI & ML.

Provides specialized insights into the application of machine learning architectures for solving complex biological modeling problems.

Dr. Shahnawaz Ahmed — ICGEB, NEW DELHI

Specialization: Scientific Research.

Brings cutting-edge translational research experience from a leading global institute, enriching the cohort with practical, real-world bioinformatics methodologies.

Dr. Shahzaib Ahamad — ICGEB, NEW DELHI

Specialization: Translational Bioinformatics, CADD, MD Simulations.

An expert in Computer-Aided Drug Design and Molecular Dynamics, offering students hands-on knowledge in simulating protein-ligand interactions.

Dr. Fatima Khatoon — PH.D.

Specialization: Neuroinformatics, NGS Data Analysis, Molecular Dynamics.

Provides highly specialized training in the intersection of neuroscience and bioinformatics, particularly in processing complex transcriptomic datasets.

Dr. R.N. Verma — GURU GOBIND SINGH INDRAPRASTHA UNIVERSITY

Specialization: Bioinformatics.

Delivers core foundational perspectives on computational genomics and standard bioinformatics algorithms from an inter-university viewpoint.

STUDENT LIFE & FACILITIES

COMPUTING FACILITIES

High-performance laboratories equipped with the latest specialized software suites. Students enjoy 24/7 high-speed internet connectivity and have access to dedicated computational servers designed explicitly to handle intensive research, NGS data processing, and machine learning workloads.

CENTRAL LIBRARY

Direct access to the fully air-conditioned Dr. Zakir Husain Library, which houses over 400,000 books, rare manuscripts, and journals. The library offers comprehensive digital resources, research databases, and reading halls that provide a serene academic environment for deep study.

HIVE CODING SOCIETY

A dynamic, student-run cooperative that actively bridges the gap between academia and industry. Hive involves students in real-world coding projects, hackathons, and technical workshops, fostering an elite culture of collaboration and ensuring graduates are completely industry-ready.

SPORTS & RECREATION

A sprawling, modern sports complex designed to support holistic student development. It features expansive facilities for cricket, football, hockey, basketball, and tennis, alongside indoor recreation centers, promoting physical well-being and active campus engagement.

BATCH DEMOGRAPHICS

Class of 2026–27 Profile

GENDER DISTRIBUTION

53% Male

47% Female

ACADEMIC BACKGROUND

B.Sc. (Life Sciences / Botany)	79%
B.Voc. / Medical Tech	7%
B.Tech / BCA / CS	5%
Other Sciences	9%

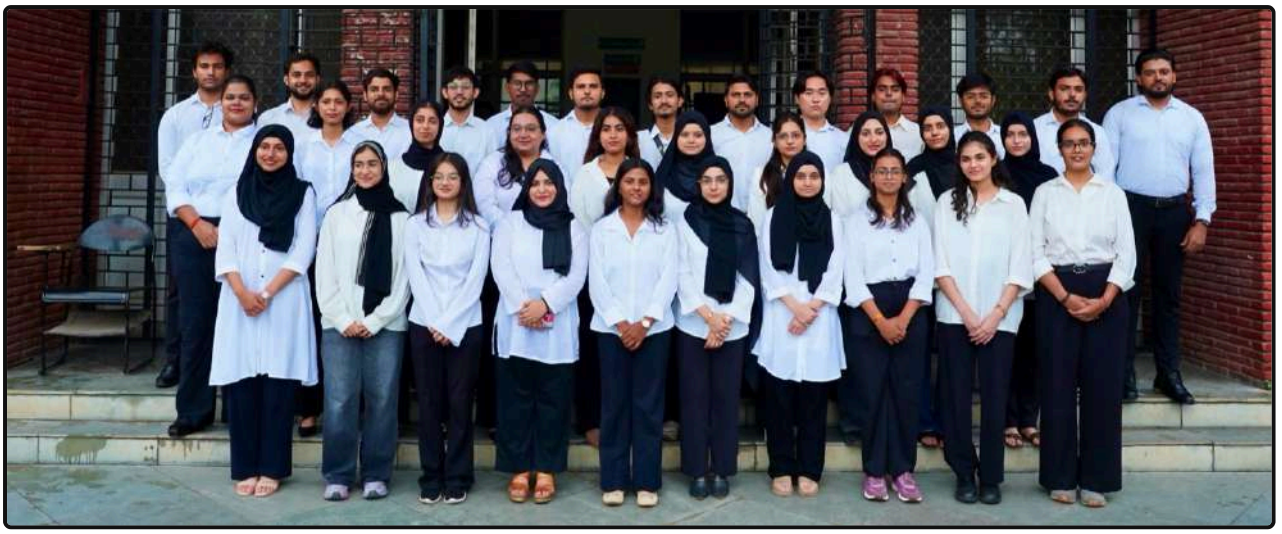

MOST COMMON SKILLS

Python & R	Highly Prevalent
SQL / DBMS	Highly Prevalent
C++ Programming	Prevalent
BLAST / Sequence Analysis	Prevalent
Machine Learning Basics	Common

RAREST / NICHE SKILLS

Molecular Dynamics (MD)	Unique
Zig & Assembly	Unique
Quantum Computing (Qiskit)	Unique
Systems Biology Modeling	Unique
Bio-Database Architecture	Unique

THE COHORT

A diverse, highly-skilled cohort united by a relentless passion for computational biology.

The Class of 2026–27 represents a dynamic convergence of life sciences and computational engineering. Handpicked through a rigorous national-level entrance process, these scholars bring together multi-disciplinary expertise ranging from molecular biology to high-performance C++ programming and data science.

Beyond the classroom, the cohort is actively engaged in developing novel bioinformatics pipelines, contributing to open-source algorithmic tools, and pushing the boundaries of what is possible in data-driven healthcare. They are fully prepared to tackle the industry's most demanding challenges from day one.
